

## Time Manipulation Puzzler Timelie Now Available For PC

April 21, 2020, Bangkok, Thailand - Urnique Studio, the indie developer behind the upcoming time manipulation puzzle game Timelie, today announced that the game has officially released for PC on Steam for \$18.99.

What began five years ago as a small class project by an ambitious group of students, early versions of Timelie went on to receive recognition from a number of prestigious competitions, including “Winner - Best Game” at Microsoft’s 2016 Imagine Cup Student Development Competition, “Winner - Best Game” at the 2016 Thailand National Software Contest, and “Winner - Best Student Technical Project” at the 2017 Bangkok International Digital Content Festival.

Assist a girl and her mysterious cat companion navigate and escape a surreal world where time literally becomes your plaything. Manipulate the unique Timeline ability to jump both backward and forward in time in order to unravel the mysteries of this surreal world. Avoid enemies and, if caught, rewind time to try again. Or, let the future play out to see if your current strategy will lead to success or capture. Experience unique single player cooperative play as you control both the girl and the cat simultaneously in your effort not only to avoid capture but also solve the mystery of your unique relationship.
